

LYVE™ Mobile

MOVE MASS DATA WITH LYVE MOBILE EDGE STORAGE SYSTEMS DELIVERED AS A SERVICE.

Data Transfer as a Service

Empower Your Data from the First to Last Mile

Lyve Mobile from Seagate delivers high-capacity edge storage that enables businesses to aggregate, store, move, and activate their data. Scalable, modular, and vendor-agnostic, this integrated bundle of storage and cloud import services eliminates network dependencies so you can transfer mass data sets in a fast, secure, and efficient manner.

Best-Fit Applications

- Mobile edge storage
- Mass-capacity data transfer
- Large lift-and-shift data migration projects
- Storage, backup, cloud, and multicloud
- Disaster recovery and data redundancy transfer projects
- Fast ingestion of mass data to data centers and cloud

Lyve Mobile Benefits

- Plug-and-play simplicity
- Fast and secure mass data movement
- Accelerated time to business insights
- Scalable, modular, and flexible devices
- Clear, efficient subscription model

LYVE™ Mobile

MOVE MASS DATA WITH LYVE MOBILE EDGE STORAGE SYSTEMS DELIVERED AS A SERVICE.

Edge Storage That's Up to the Task

Transfer mass data in days—not weeks.

Lyve Mobile Array	Lyve Mobile Rackmount Receiver	Lyve Mobile PCIe Adapter	Lyve Mobile Mount Front Loader	Lyve Mobile Array Shipper
Put mass edge data in motion with Lyve Mobile Array, a secure storage solution with enormous capacity of up to 96TB and high performance of up to 6GB/s.	Turn your Lyve Mobile Array into a data center storage system with redundant power and high-speed interfaces like SAS, Fibre Channel, and iSCSI.	This adapter is designed for optional use with the Lyve Mobile Mount. Use it to connect your Lyve Mobile Array directly to an external PCIe (SFF-8644) port on your computer.	Designed to support horizontal loading of the Lyve Mobile Array, the Front Loader enables easier cable management with convenient front access.	Transport your Lyve Mobile Array in extreme conditions with this ruggedized carrying case.
